

DOZER MATS™

“When you’ve got to get through”

Stop road damage caused by bulldozers or other types of track vehicles with sturdy, environmentally conscious Dozer Mats. Dozer Mats prevent damages caused by steel treads crossing roadways, concrete shop floors and driveways. They work great in Cemeteries under Front Buckets to prevent damage to Turf or Markers. Unlike tires, Dozer Mats do not hold water that soaks you when they are handled. • **No mess from splashing water.**

Dozer Mats are designed with a rugged textured surface which will not allow track vehicles to slip or slide on wet or icy surfaces. Dozer Mats can also be used to line the bed of an equipment trailer to prevent slippage on the wood or steel surfaces. • **Bedliner for equipment trailer.**

• **Easy to handle.** Dozer mats are lightweight and portable. Lay them flat or roll them up for easy storage. Dozer Mats weigh only 38 lbs. are 18” wide X 8’ long, with hand cut outs on both ends for easy handling. • **Rugged, use under any sized track vehicle.**
