

MUD-TRAKS™

“When you’ve got to get through”

- MUD-TRAKS™ are super strength, light-weight panels made from engineered composite fiberglass materials. This space-age material allows the panels to bend and twist, and this flexibility prevents MUD-TRAKS™ from breaking when under extreme loads. We have mats to handle 17,000 lb. backhoes to 100,000 lb. cranes.
- MUD-TRAKS™ form a continuous, temporary roadway for your vehicles. Whether you’re driving over lawns or through a rain soaked plowed field, there is a “MT” mat to fit the situation.

- MUD-TRAKS™ are designed by size and weight to be handled by workmen in the field. Injuries are a big part of the cost of doing business. Control Comp costs with lightweight MT's.
- MUD-TRAKS™ are textured top and bottom for good traction and ground gripping.
- MUD-TRAKS™ are an investment for the Right Solution. Sure, there are other low cost, short term alternatives, but you'll re-buy that product several times over, and it still won't do the job. With superior design and materials, MT's will keep you working for years. And that is True Value.
